ABOUT ME

Senior Software Engineer with **4+ years of frontend development experience**, specializing in **React.js, Vue.js, JavaScript, and modern web technologies**. Experienced in building scalable enterprise applications, integrating REST APIs, and collaborating in Agile environments to deliver high-quality, user-centric solutions.

WORK EXPERIENCE

LTM

Sr. Software Engineer 2026 – present | Mumbai

- Collaborated with stakeholders to build and deploy multiple high-performance websites using **Nuxt.js** and **Node.js**. Implemented **RESTful** APIs using **Nest.js** to improve performance and scalability.
- Translated client requirements into effective technical solutions through thorough analysis, research, and solution design.
- Received client recognition for delivering impactful solutions and ensuring alignment with business requirements.
- Took complete ownership of Module, driving the end-to-end development process while ensuring seamless integration and robust functionality.
- Introduced innovative solutions like a dynamic page creation module with the help of Contentful, improving productivity and efficiency for clients.
- Maintained high code quality standards, achieving zero critical code smells, 80%+ unit test coverage, and <4% code duplication using SonarQube metrics.
- Conducted thorough code reviews to enforce best practices and ensure code quality, security, and performance standards.
- Delivered resolutions to client inquiries with minimal turnaround time.
- **Application Development:** Owned key UI screens and reusable components from wireframes through production, collaborating with teams to meet release timelines.

Software Engineer 2022 – 2025 | Mumbai

- **Agile & Jira:** Participated in estimation, sprint planning, and daily stand-ups; tracked delivery status and defects in Jira.
- **Collaboration:** Coordinated with backend engineers, QA, and business analysts to clarify requirements, resolve integration issues, and support smooth deployments.
- **UI/UX Implementation:** Built responsive, accessible, performance-optimized interfaces using Vue.js, Vuetify, and TypeScript; improved consistency through reusable layouts and components.
- **API Integration:** Integrated multiple service-provider APIs; implemented robust error handling and data states to support real-time updates.
- **Testing & Release:** Supported releases across DEV, SIT, and UAT; partnered with QA and stakeholders to validate fixes and ensure production readiness.

EDUCATION

B.E (Information Technology)

Padmabhushan Vasantdada Patil Pratishthan College of Engineering *2019 – 2021 | Mumbai*

SKILLS

Frontend: Vue.js, React.js, Nuxt.js, Next.js, Redux, Tailwind CSS, Material UI, Vuetify.js

State Management: Redux, Pinia

Backend: Node.js, Express.js, Nest.js

Cloud & DevOps: Microsoft Azure, Azure DevOps, GitHub Actions

Databases & Caching: MongoDB

Tools: Git, SonarQube, VS Code, Jira, Github Desktop, Postman

COURSES

React - The Complete Guide 2023 (incl. React Router & Redux), *Udemy*

Strengthened expertise in **React** through hands-on projects, focusing on component-driven development, state management, routing, reusable UI patterns, and scalable application design using **React Router** and **Redux**.

Build Responsive Real-World Websites with HTML and CSS, *Udemy*

A web design framework with easy-to-use rules and guidelines to design eye-catching websites How to plan, sketch,design, build, test, and optimize a professional website How to make websites work on every possible mobile device (responsive design)

Tailwind CSS From Scratch | Learn By Building Projects, *Udemy*

This is a fun project-based course to learn how to create awesome layouts using the Tailwind CSS framework and get comfortable using utility classes over something like Bootstrap, which uses component-based classes.

Building Business Applications with Vue.js and MongoDB, *Pluralsight*

Building Business Applications with Vue.js and MongoDB, you will learn how to use a framework that is growing fast in popularity and use, Vue.js, to build business applications.

Master Nuxt 3 - Full-Stack Complete Guide, *Udemy*

This path focus on Mastering Nuxt 3 fundamentals and advanced features, Styling applications effectively with Tailwind CSS, utilizing layouts for reusable page structures, Creating a full-fledged blog and portfolio using Markdown. Implementing file-based routing in Nuxt for content management.

NestJS: The Complete Developer's Guide, *Udemy*

1. Basics of NestJS, and it’s architecture. 2. Nest’s request-response cycle. 3. To write integration and unit tests to ensure your code is working. 4. Tie different types of data together with TypeORM relationships 5. Build authentication and permissions systems from scratch
