ABOUT ME

Senior Software Engineer with 4+ years of experience in frontend development specializing in React.js, Vue.js, and modern JavaScript (ES6+). Strong expertise in building scalable, high-performance web applications, reusable UI components, and REST API integration. Experienced in improving application performance, optimizing UI, and delivering enterprise-grade solutions in Agile environments

WORK EXPERIENCE

LTM **2022-Present | Mumbai**

Sr. Software Engineer

- Designed and developed scalable frontend applications using React.js, Vue.js and Next.js, Nuxt.js, improving application performance by 30%
- Built reusable UI components, reducing development time by 25% across modules
- Integrated REST APIs using Node.js and NestJS, ensuring efficient data handling and optimized performance
- Improved code quality with 80%+ unit test coverage and reduced code duplication (<4%) using SonarQube
- Led end-to-end module development, ensuring timely delivery and seamless integration
- Optimized UI performance and reduced load time through efficient state management and lazy loading
- Maintained high code quality standards, achieving zero critical code smells, 80%+ unit test coverage, and <4% code duplication using SonarQube metrics.
- Conducted thorough code reviews to enforce best practices and ensure code quality, security, and performance standards.
- Delivered resolutions to client inquiries with minimal turnaround time.
- **Application Development:** Owned key UI screens and reusable components from wireframes through production, collaborating with teams to meet release timelines.
- Built responsive, performance-optimized user interfaces using Vue.js, Vuetify, and Nuxt.js, focusing on reusable layouts, component-driven architecture, and accessibility standards
- Designed RESTful APIs following **clean architecture and SOLID principles**
- Implemented **authentication and role-based authorization**
- Worked with **microservice-ready backend modules**

Software Engineer

- **Agile & Jira:** Participated in estimation, sprint planning, and daily stand-ups; tracked delivery status and defects in Jira.
- **Collaboration:** Coordinated with backend engineers, QA, and business analysts to clarify requirements, resolve integration issues, and support smooth deployments.
- **UI/UX Implementation:** Built responsive, accessible, performance-optimized interfaces using Vue.js, Vuetify, and TypeScript; improved consistency through reusable layouts and components.
- **API Integration:** Integrated multiple service-provider APIs; implemented robust error handling and data states to support real-time updates.
- **Testing & Release:** Supported releases across DEV, SIT, and UAT; partnered with QA and stakeholders to validate fixes and ensure production readiness.
- Introduced innovative solutions like a dynamic page creation module with the help of Contentful, improving productivity and efficiency for clients.

EDUCATION

Bachelor of Engineering (Information Technology)

- *Padmabhushan Vasantdada Patil Pratishthan College of Engineering* *2019 – 2021 | Mumbai*

  Sion, Mumbai, Maharashtra, INDIA

Diploma (Information Technology)

- *Government Polytechnic Mumbai (GPM)* *2016 – 2018 | Mumbai*

SKILLS

Frontend: React.js, Vue.js, JavaScript (ES6+), HTML5, CSS, Nuxt.js, Next.js, Tailwind CSS, Material UI, Vuetify.js,

State Management: Redux, Pinia

Backend: Node.js, Express.js, Nest.js

Cloud & DevOps: Microsoft Azure, Azure DevOps, GitHub Actions

Databases & Caching: MongoDB

Architecture: Frontend Architecture, System Design, Clean Architecture

Backend: RESTful APIs, Authentication, Authorization, Microservices (basic)

Tools: Git, SonarQube, VS Code, Jira, GitHub Desktop, Postman

COURSES

React - The Complete Guide 2023 (incl. React Router & Redux), ***Udemy***

- Strengthened expertise in **React** through hands-on projects, focusing on component-driven development, state management, routing, reusable UI patterns, and scalable application design using **React Router** and **Redux**.

Build Responsive Real-World Websites with HTML and CSS, ***Udemy***

- A web design framework with easy-to-use rules and guidelines to design eye-catching websites How to plan, sketch, design, build, test, and optimize a professional website How to make websites work on every possible mobile device (responsive design)

Tailwind CSS From Scratch | Learn by Building Projects, ***Udemy***

- This is a fun project-based course to learn how to create awesome layouts using the Tailwind CSS framework and get comfortable using utility classes over something like Bootstrap, which uses component-based classes.

Building Business Applications with Vue.js and MongoDB, ***Pluralsight***

- Building Business Applications with Vue.js and MongoDB, you will learn how to use a framework that is growing fast in popularity and use Vue.js to build business applications.

Master Nuxt 3 - Full-Stack Complete Guide, ***Udemy***

- This path focuses on Mastering Nuxt 3 fundamentals and advanced features, Styling applications effectively with Tailwind CSS, utilizing layouts for reusable page structures, creating a full-fledged blog and portfolio using Markdown. Implementing file-based routing in Nuxt for content management.

NestJS: The Complete Developer's Guide, ***Udemy***

- Basics of NestJS, and its architecture. 2. Nest's request-response cycle. 3. To write integration and unit tests to ensure your code is working. 4. Tie different types of data together with Type ORM relationships 5. Build authentication and permissions systems from scratch

AI with GitHub Copilot for JavaScript and React Developers, ***Udemy***

- This course empowers JavaScript and React developers to maximize productivity using GitHub Copilot.

SOFT SKILLS

Problem Solving
Technical Documentation
Stakeholder Management
Mentoring & Knowledge sharing
